Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13,15-18,20,24-32,35-48 and 50-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fulton et al in view of Boisvert as set forth in the previous office action.

It is well settled that this office carries only the burden of presentation of a prima facie case of obviousness, not a reconstruction of the combined references. What is proposed here is the substitution of one known fluid supply system in lieu of another known system both shown used in toilet bowl flushing environments. While the system of Boisvert can be viewed as more complex as argued for, it is capable of constant pressure as opposed to a bladder system. The instant claims merely call for "bladder means" within the second compartment and is silent as to how the fluid is impelled. It would have been obvious to the ordinary artisan to replace a tank such as 24 of Fulton et al with a bladder arrangement such as taught by Boisvert as both are shown usable in similar art devices and both constitute known storage systems. At the bottom of page 12, applicant argues that Boisvert provides water from 22 as well as 12. Where is this set forth in the Boisvert disclosure? Notwithstanding, the claims call for nothing but the broad recitation of a bladder and as same is a known prior art storage device, its use in Fulton et al would have been obvious to the ordinary artisan.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3751

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
